10. Remarks and Other Relevant Information: Please describe the purpose of your trust water right donation in detail and any other information that you believe Ecology needs in order to evaluate your donation.

Explain:

In 2001 BLM received a superseding certificate of water right from the Washington Department of Ecology. This right was established for use of ground water to irrigate up to 9 pothole ponds for wildlife habitat improvement. The water use continued until 2008. Annual letters were sent to WDOE from BLM documenting recorded use of this well and the letters are attached. The well is metered and power records for 2008 that include metering information is also attached.

BLM is not currently utilizing the water right but is interested in maintaining the right for future use by temporarily donating it to the Washington State Trust Water Right Program.

Note: The above section may also be used to prescribe the terms of the donation into Trust as described in RCW 90.42.080(1)(b)

11. Signatures: This form must be signed by the donor, the water right holder, and the landowner of the existing place of water use, if different from the water right holder. Additionally, if the water right is within an irrigation district, this form must be signed by a representative with signature authority for the irrigation district.

I certify that the information above is true and accurate to the best of my knowledge. I hereby grant staff from the Department of Ecology access to the above site(s) for inspection and monitoring purposes. If assisted in the preparation of the above application, I understand that all responsibility for accuracy of the information rests with me.
